# Board Decision Milestones

**Presentation**  
Board Work Session  
at 3 p.m.

**Discussion & Public Comment**  
Board Meeting  
at 5 p.m.

**Q&A & Discussion**  
Board Work Session  
at 9 a.m.

**Discussion, Public Comment & Decision**  
Board Meeting  
at 5 p.m.

# Today's Work Session

During today's discussion BVSD staff will provide a review of the key data points and considerations that led to the Resilient Schools proposal.

We will provide space to dive deeper into our rationale, the data supporting it.

Our goal is to address themes from public comment and your questions.

The background of the slide is a photograph of a large group of students sitting on a wide set of concrete stairs in a school hallway. The students are engaged in various activities, some reading books, others talking. The image is overlaid with a semi-transparent blue filter and large, light-blue geometric shapes (triangles and a circle) that create a modern, layered effect.

# Our Methodology

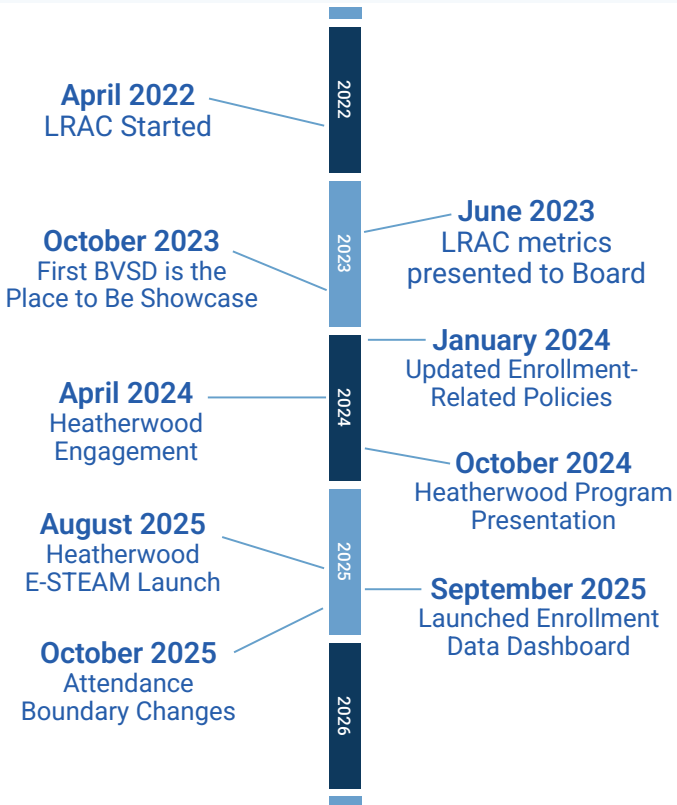

How we made our decisions

# LRAC Metrics

- **Student experience centered from the beginning**
- Classes/grade measures student experience
  - Below two classes/grade (rounds\*) is where schools really feel the impact of declining resources
  - Most important metric
- Percent utilization measures operational efficiency and helps to account for differing school capacities
- Early warning system for schools and the district as a system

**Round** = avg. of 25 students/class  
**One round** = 150 student enrollment  
**Two rounds** = 300 student enrollment  
**Three rounds** = 450 student enrollment

**Decision-making should be in the context of looking at geographic areas or multiple schools at the same time if appropriate.**

# Regional Approach: October 2025 Worksession

- Looking at enrollment through the lens of the LRAC metrics, by 2030 **more than half** of the elementary schools in Boulder, Louisville/Superior and Broomfield would be below 2 classes/grade.
- Reports from schools regarding early impacts of declining enrollment
- Board directed staff to change course
  - Can no longer “make it work” by pushing additional resources into under-enrolled schools
  - Take a regional approach vs. school by school

## Enhanced Communications

February 2026    March 2026    April 2026    May 2026    June 2026    August 2026    September 2026

The panels illustrate the communication strategy for BVSD Enrollment Impacts, starting with a focus on the journey and community engagement in February, moving through detailed impact reports and community feedback in March and April, and culminating in a final proposal and planning phase in September.

# Top Priorities

## RESILIENT SCHOOLS COMMUNITY SURVEY

### Items selected as most important (Maxdiff) (N = 5244)

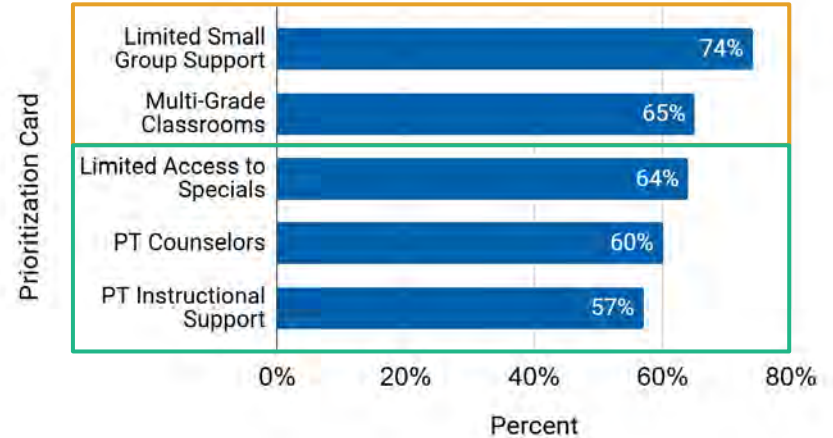

- Small Class Sizes
- Equitable Funding
- Neighborhood Proximity
- Advanced Academics
- FT Art, Music, & PE
- FT Math & Literacy Specialists

### Must-Haves (N = 5244)

## COMMUNITY ENGAGEMENT SESSIONS

### Experience Cards (N= 106)

### ROUNDTABLES (N=30)

- Small Class Sizes (90%)
- PT Staff Challenges (66%)

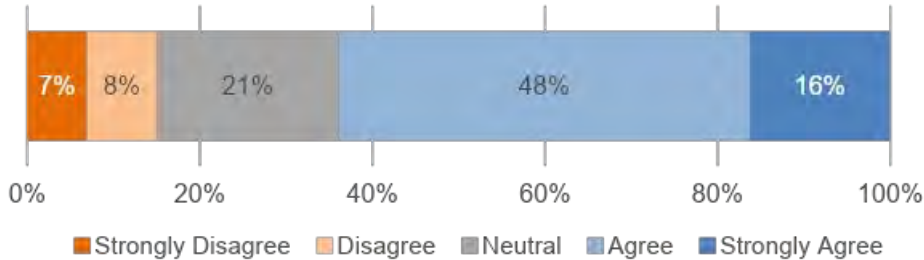

# Community feedback regarding top priorities

## COMMUNITY ENGAGEMENT SESSIONS

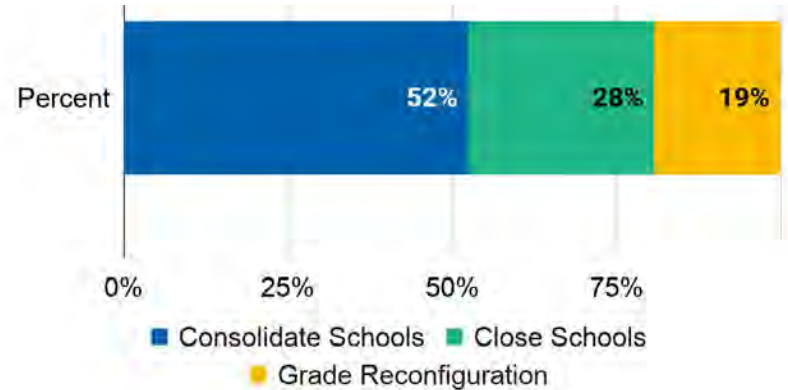

### Top Shift Rating: Consolidate Schools (N= 503)

- I believe this action is a move in the right direction to solve the challenges of under-enrolled schools.

## ROUNDTABLES

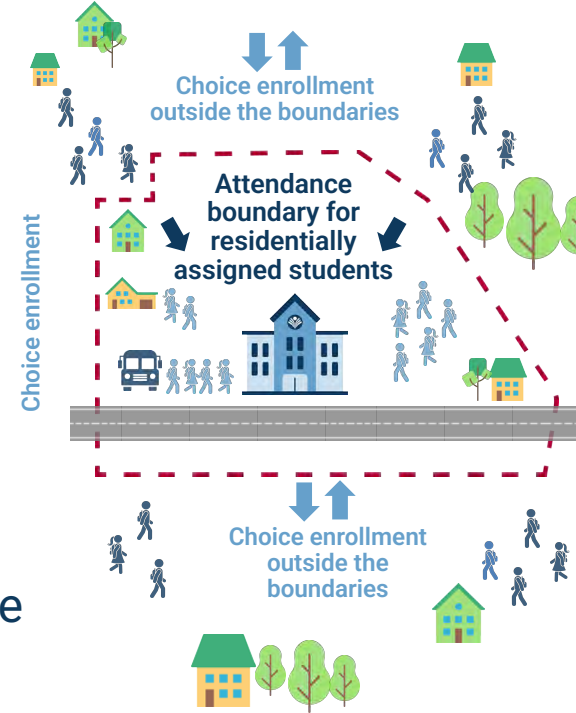

### Top Shift Rating: Consolidate Schools (N= 252)

# Our Methodology

## Resident student population is the starting point

- Every student is guaranteed a seat in the neighborhood school in their assigned attendance area.
- Colorado law allows parents to apply to attend another school only if there is available space and programmatic capacity.
- Resident student population and housing stock data is less variable and more predictable than parent choice.
- Open enrollment is the valve that we can use to fill space in a neighborhood school once we account for resident students.

# Data Sources

- **BVSD Student Records**

Student-level CDE verified data that can be aggregated as resident students, enrolled students or any category tracked by BVSD. These are specific records not estimations or extrapolations. Includes current and historic data. Uses: Past trends, Projections, and Student Yields.

- **Colorado Department of Health and Environment Birth Dataset**

Taken from birth certificates and provided in geographic format. Can be aggregated for any geography including school attendance areas. Historic data available. Uses: Past trends, projections (kindergarten)

- **Boulder/Broomfield County Parcel Records**

Geographic data that includes real estate information including housing types and counts. Uses: housing analysis and trends, projections, student yields.

- **Other Information**

Development referrals from local governments (projections) and BVSD building floor plans (Capacity). Census, State Demographer Office, Colorado Dept. of Education, and DRCOG used as needed especially for comparison and calibration.

# Enrollment Projections

- Cohort survival method is the principal technique (standard for most school districts).
- Cohorts based off of resident students rather than enrollment to capture inherent trends.
- Model includes direct inputs for open enrollment flow (in and out), new housing development, and birth rates.

## BVSD RESIDENT STUDENT-BASED OVERALL COHORT PROJECTION

### INPUT ENROLLMENT HISTORY

Enrolled Students: 403 to 462

Utilization: 82% to 94%

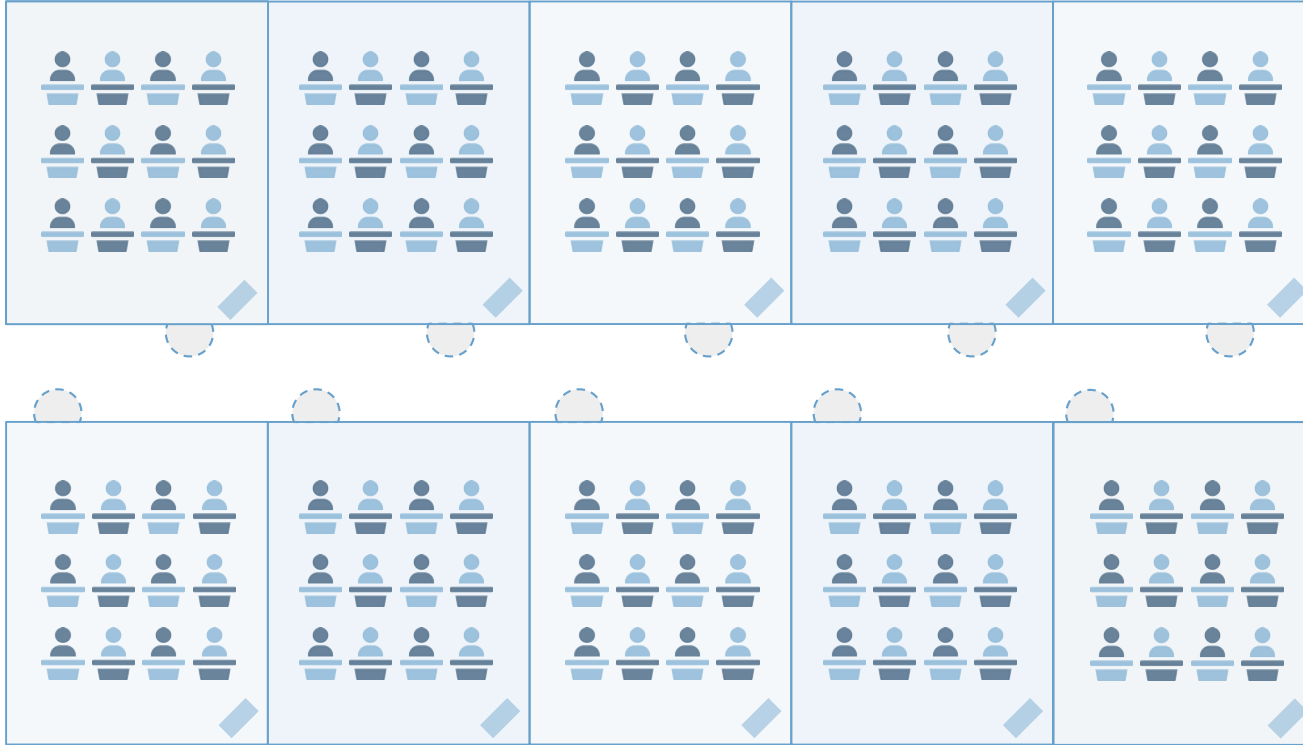

\*Projected enrollment ranges dependent on number of resident students from the sending school attending the receiving school

# Levers to Manage Enrollment: Choice Enrollment

# Levers to Manage Enrollment: Classroom Usage

# Summary

- **Student experience centered from the beginning:** one key metric is classes/grade because it indicates the level of **ALL** staffing for a school – not just classroom teachers—which creates the student experience
- Engaged the community to gather data regarding values and priorities
- Developing the Resilient Schools plan: analyzed resident student populations and where students live compared to school locations, enrollment trends, building capacity, facility conditions and long-term student needs

# Discussion

A background image of students sitting on bleachers in a school gymnasium, many of whom are holding and reading books. The image is overlaid with a dark blue semi-transparent filter and large, light blue geometric shapes (triangles and a circle) that create a modern, layered design.

# Our Resources

## Reallocating to meet student needs

# Reinvesting in the Student Experience

## RECURRING ANNUAL SAVINGS

**\$3.5M - \$4.0M**

Estimated funding redirected to support the student experience every year

=

**Smaller Elementary Class Sizes**

+

**Increased Student Access**

Providing students with increased differentiated supports and access to art, music and PE teachers

## TOP TWO COMMUNITY ENGAGEMENT PRIORITIES

## ONE-TIME TRANSITION COSTS

**Facility Modifications**

**\$7.5M - \$10.0M**

Some offset by savings from Bond projects

**School Transition Support**

**\$5.0M - budgeted, FY27**

Transition staffing, moving costs, transitional support

| <b>Total</b>         |                                                 | <b>\$7,500,000</b> | <b>\$10,000,000</b> |

Based on the 10-year projected capital expenditures, there could be a potential savings of ~\$44.8M due to not investing in the schools that will be closed over the next 10 years. The actual savings will be dependent on the future use of the buildings once the Board takes action.

# Reinvesting in the Student Experience

## RECURRING ANNUAL SAVINGS

**\$3.5M - \$4.0M**

Estimated funding redirected to support the student experience every year

=

**Smaller Elementary Class Sizes**

+

**Increased Student Access**

Providing students with increased differentiated supports and access to art, music and PE teachers

## TOP TWO COMMUNITY ENGAGEMENT PRIORITIES

## ONE-TIME TRANSITION COSTS

**Facility Modifications**

**\$7.5M - \$10.0M**

Some offset by savings from Bond projects

**School Transition Support**

**\$5.0M - budgeted prior to plan development/finalization**

Transition staffing, moving costs, transitional support

# Discussion

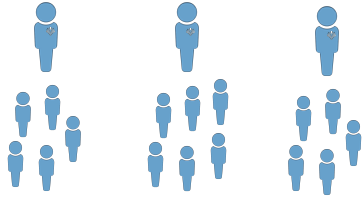

# Student Experience

Providing the outstanding education our students deserve  
and the opportunities our families expect

# Elementary School Programmatic Impacts

## Three Round (~450)

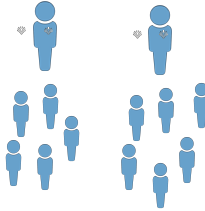

6 grades X 3 classes/grade

- ABC Specials rotation
- Instrumental music
- Ideal for programming
- Dedicated counselor, Specials teachers, Teacher Librarians, & Special Education teachers

## Two Round (~300)

6 grades X 2 classes/grade

- Traveling teachers
- Scheduling complexity & limitations
- Programming limitations

## One Round (~150)

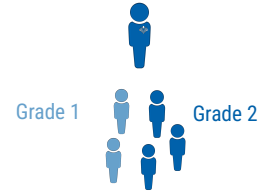

6 grades X 1 classes/grade

- Limited teacher collaboration
- Lack of flexibility to shift students
- More programming limitations

## Multi Grade

(<1 class per grade level)

- Yearly change
- Complex planning for teachers

Current class size maximum - BVEA Negotiated Agreement

Grades K-1 = 26

Grades 2-3 = 29

Grades 4-5 = 31

# Specials: traveling teachers & split positions

| School Year | Traveling Teachers | Schools with Traveling Teachers | Split Positions (no home teacher) |
|-------------|--------------------|---------------------------------|-----------------------------------|
| 2024-2025   | 13                 | 10                              | 1                                 |
| 2025-2026   | 29                 | 24                              | 6                                 |
| 2026-2027   | 36                 | 29                              | 10                                |

## Current Projections without Resilient Schools Proposal

|           |    |    |    |
|-----------|----|----|----|
| 2027-2028 | 40 | 29 | 12 |
|-----------|----|----|----|

## Current Projections with Resilient Schools Proposal

|           |    |    |   |
|-----------|----|----|---|
| 2027-2028 | 18 | 14 | 0 |

# Specials: what is the impact?

When teachers are traveling, it impacts:

- Efficiency
- Continuity
- Flexibility
- Collaboration
- Student experiences

# Benefits for Special Education

## Special Education Services K-5

- Increased service providers
- Increase of resource teachers
- Peer grouping availability
- Special Education staff collaboration
- Increased on-site support

# Family Support with School Age Care (SAC)

## Increasing capacity and staffing to address demand

- Increase licensed spaces
- Increase number of qualified child care staff
- Set expectations on school facility use and child care

# Family Support with School Age Care (SAC)

## Current SAC Model at a School

Homeroom  
Homeroom  
Homeroom

Pod #1  
(30)

Capacity = 30

Pod #1  
(30)

Pod #2  
(15)

Capacity = 45

Pod #1  
(30)

Pod #2  
(30)

Capacity = 60

SAC sites have capacities of 30, 45 or 60

Centered in one homeroom (e.g. cafeteria)

Groups must be split into pods (max 30)

Sites *can* expand beyond 60 students:

- with the addition of a second homeroom,
- and with enough staff

Homeroom 2

Pod #1  
(30)

Pod #2  
(30)

Capacity = 120

Staff/Student Ratio=  
**1:15**

# Preschool

All preschool locations for the 2027-2028 school year will be announced on October 1, 2026.

## **Additional complexities**

Adjusting preschool locations has additional complexities that require more time.

## **Individualized family support**

Maintaining preschool in each region is a priority, and our preschool community liaisons will work directly with individual returning preschool families who are impacted to support with next steps.

# Transportation

Eligible students will receive transportation to their assigned neighborhood school.

Eligibility is based on BVSD policy:

- **Elementary:** 1.5+ miles from assigned school
- **Middle:** 2+ miles from assigned school
- **High:** 2.5+ miles from assigned school

Transportation required by a student's IEP will continue.

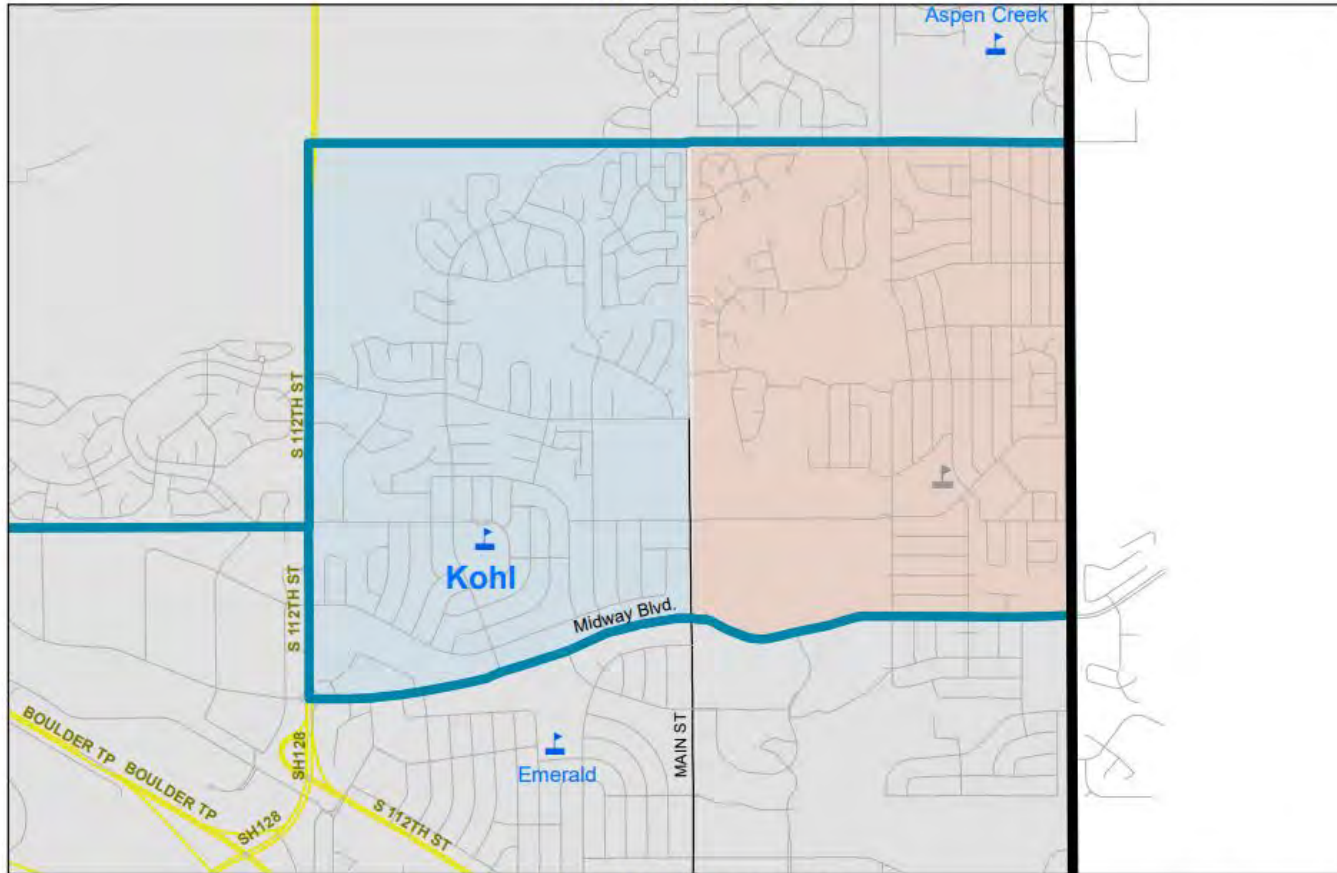

Families who choose a school outside their assigned attendance area are responsible for transportation; students may use an existing bus stop if space is available.

Measurements for determining eligibility for bus transportation are made along the shortest normal and safe walking route from home to school. Measurements are made from the main entrance of the school to the property line of the student's residence that is closest to school on the route traveled.

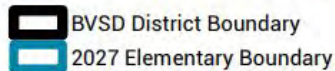

If there is a safety hazard along the route beyond those experienced by other students of similar age walking under similar circumstances, an exception to the above distances may be made. Exceptions due to hazardous walking conditions are determined by the Transportation Department.

## ATTACHMENT A

New Kohl El. Attendance Area

## Kohl Adjustments

- Students east of Main Street will receive transportation

### Bike/Walk Assets:

- Traffic light with crossing signals at Main/Eagle & Main/136th
- New traffic light at Main/Miramonte
- Crosswalk at Main and 14th

## ATTACHMENT B

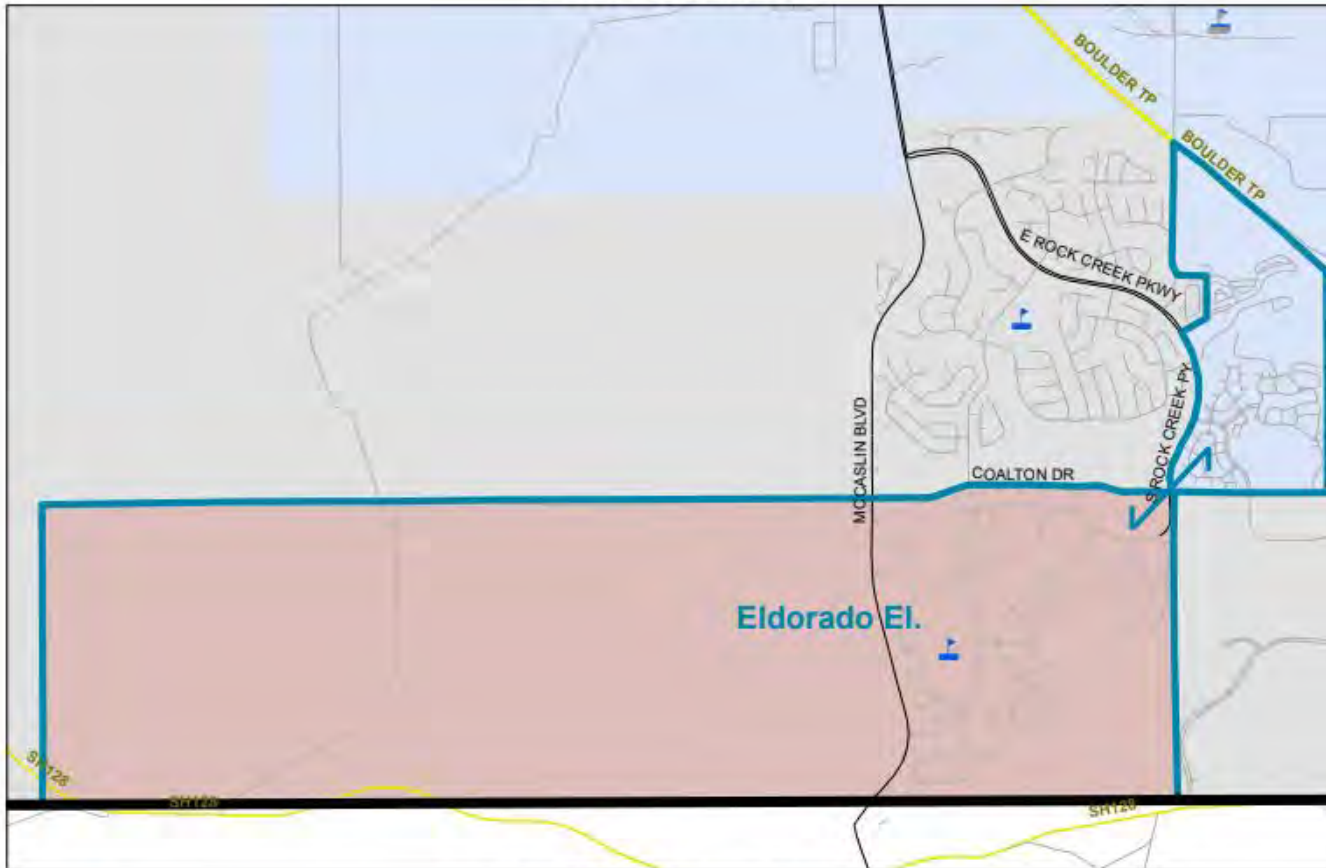

### Eldorado Adjustments

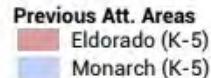

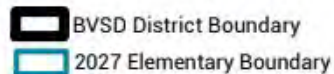

- Students north of Coalton Road will receive transportation.

#### Bike/Walk Assets:

- Underpass at Bell Flatirons/Rock Creek Pkwy
- Underpass at Coalton Rd., east of McCaslin
- Traffic light with crossing signals at Coalton/Rock Creek Pkwy.

New Eldorado El. Attendance Area

## ATTACHMENT C

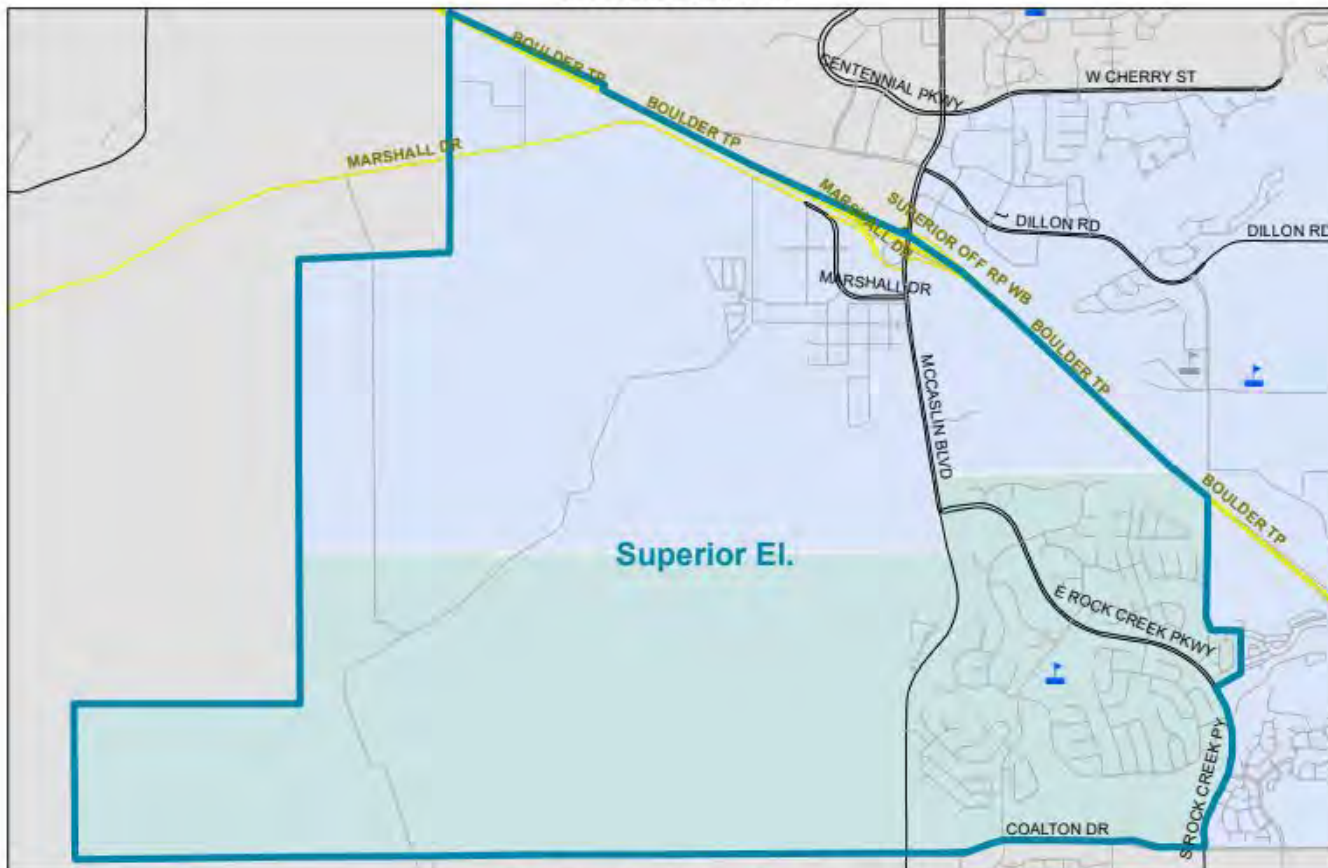

### Superior Adjustments

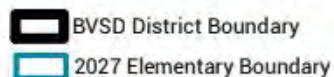

- Students north of Vista Corridor Trail will receive transportation.

### Bike/Walk Assets:

- Underpass at McCaslin & Coal Creek Trail
- Hwy 36 bikeway
- Extensive path system in Superior
- Challenge of a steep hill from Old Town to Superior Elementary

# Discussion

# Other Community Questions

# Safe, healthy schools

## Asbestos Management in BVSD Schools

While asbestos-containing materials (ACM) exist in a number of BVSD schools, there are no known safety concerns in any of these schools.

**The presence of asbestos-containing material does not, by itself, indicate that a building is unsafe.**

When these materials remain intact and undisturbed, they can be safely managed in place through regular inspections.

- Each school has an asbestos management plan which identifies the known ACM in the school.
- Surveillance every six months
- In depth re-inspection every three years
- Inspections and periodic surveillances are conducted by industry-certified staff
- Responding to CORA requests for documentation

# Boulder Comprehensive Plan

- BVSD has communicated with City of Boulder staff about the comprehensive plan changes over the course of this past year.
- Changes to the plan primarily apply to infill development proposals with only a limited capacity to significantly impact enrollment within BVSD for the foreseeable future.
- We are hopeful that the City of Boulder and Boulder County's actions can make a difference over the long run and can help enrollment levels in the district.
- Under the current circumstances, BVSD does not have concerns over crowding in any schools within the communities named in the Resilient Schools plan.
- Proposal still meets *15 Minute Neighborhood* expectations

# Resolution Additions

- **Whereas:** the Board affirms the community's desire to maintain a variety of educational models through BVSD focus schools and recognizes the need to better locate these existing programs throughout the district;
- **Be it further resolved:** School Age Care will be provided at each of the receiving schools, and BVSD will work to provide available slots that are reflective of the expanding school populations; students who are currently enrolled in a SAC program at a closing school will receive returning student status in the spring lottery.
